

**GEMINI · C**

BY OSSEUS

## **OSSEOINTEGRATION**

Proprietary post processing of the titanium endplates creates an ultra-porous surface topology optimized for bony on-growth

## **ANATOMIC**

Anatomical footprint and domed profile mimic the shape and concavity of the disc space, allowing for maximum endplate contact.

## **VISUALIZATION**

Radiolucent PEEK core allows for maximum fluoroscopic visualization.

## **ERGONOMIC**

Intelligently contoured instruments designed for increased intuitiveness

The Gemini-C Cervical Interbody's proprietary hybrid design capitalizes on the osteoconductive properties of rough, porous titanium, while allowing for the radiolucent and biomechanical properties of PEEK. The anatomical footprint and domed profile mimic the shape and concavity of the disc space, allowing for maximum endplate coverage. By addressing the clinical needs of osseointegration, radiographic visualization, and subsidence reduction, the Gemini-C positions itself as one of the most innovative concepts in its class.

## TECHNICAL SPECIFICATIONS

---

### GEMINI-C CERVICAL INTERBODIES

---

#### FOOTPRINTS

14 x 12mm  
16 x 13mm  
18 x 14mm

#### HEIGHTS:

5mm	9mm
6mm	10mm
7mm	11mm
8mm	12mm

#### LORDOSIS:

6°
